Dear sir,

RE: REQUEST FOR A DONATION OF TWO BOREHOLES

Reference to the above subject matter.

I'm humbly requesting for a donation of two boreholes for two different villages. One village is about 300km away from Lusaka that is Choma district while the other is in Kafue district, and it is about 45kms from Lusaka. -Zambia

The people who reside in these villages are in dire need to clean drinking water. The village in Choma has only one borehole for 40 households. While the other village in Kafue about 14 households would benefit if the borehole is sunken

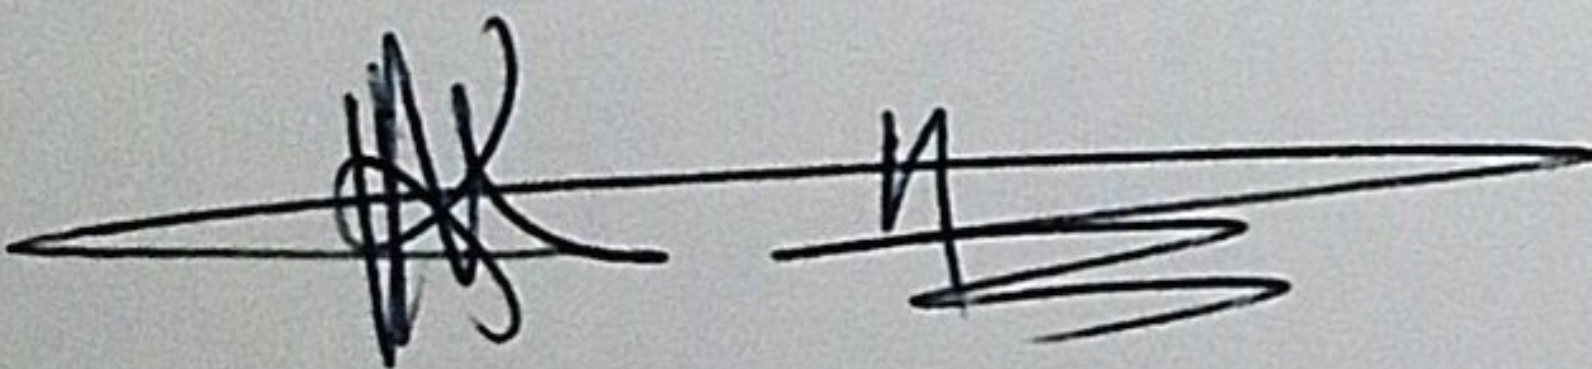

once granted the boreholes would help in their daily consumption as women walk long distances to fetch for water. Domestic animals will also have drinking water readily available.

The cost of one borehole is Fourty two-thousand-kwacha (K42, 000) equivalent to \$1,555 each

Find attached quotation for one borehole

Your assistance is highly appreciated.

Yours faithfully

Pastor Kenny Manjimela
